About Me

A Results-Driven Full-Stack Developer With 3+ Years Of Production Experience Specializing In Laravel Backend Architecture And Flutter Mobile Development. Proven Expertise In Building Scalable, Secure Systems Like The Hitamo Space Event Platform And The WellnessBridge Health Application. Combines Technical Mastery With Project Leadership—having Managed Teams And Delivered End-To-End Solutions At Binary Hub. Experienced In Remote Collaboration, CI/CD, And Mentoring Global Developer Cohorts. Passionate About Writing Clean, Efficient Code And Creating Impactful Digital Solutions That Serve Real Users.

Experiences

Software Engineer

Aug 5th 2024 - Feb 15th 2025

POWERLEARN PROJECT AFRICA

As A Software Engineer Intern & Trainer At Power Learn Project, I Delivered Dual Responsibilities. I Contributed To Production Software Development, Writing Clean Code And Building Scalable Features. Concurrently, I Mentored A Global Cohort Of Developers Across 54 Countries, Creating Technical Curriculum, Conducting Live Coding Sessions, And Providing Personalized Guidance To Foster Their Growth In A Remote Setting.

Project Manager/Backend Developer

Aug 15th 2022 - Present

UR-Binary Hub Incubation

As Project Lead & Backend Developer At Binary Hub, I Drove End-To-End Project Delivery From Planning To Deployment. I Managed Team Workflows And Stakeholder Alignment While Architecting And Building Core Backend Systems Like Hitamospace. My Technical Execution Included Developing Scalable Laravel APIs, Payment Integrations, And Secure Authentication, Ensuring Robust Performance For Platforms Serving The University Community And Public.
